

# WEB HANDLING

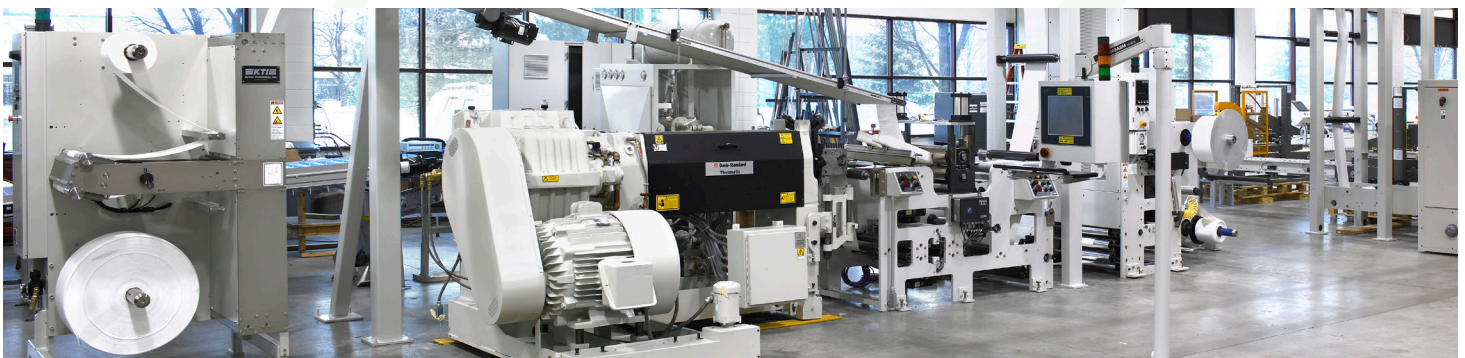

Midwest Engineered Systems will configure your web handling application utilizing existing equipment, 3rd Party / OEM equipment, new designs, or complete integration of the three. Our experienced web handling systems engineers will integrate a seamless package that will deliver improved operations from a variety of the best equipment options and combinations available.

## **WEB HANDLING & CONVERTING CAPABILITIES:**

- Coating and Laminating
- Flexo, Gravure and Digital Printing
- Slitting and Converting
- Unwinds and Rewinds
- Splicing Equipment
- Roll Handling Systems
- Process Analysis
- Equipment Upgrades and System Retrofits
- Specialty Packaging Systems
- Complete Installation Services

MWES customers include a broad range of companies ranging from initial startups to Fortune 500 corporations. Our customer list includes large scale OEM Web Handling equipment suppliers, to production end-users. We deliver the most demanding innovative solutions for all their web handling challenges.

# RETROFITS, UPGRADES & ADDITIONS

With today's rapidly changing technology, customer machines and systems often require upgrades, replacements or additions. Along with our new equipment solutions, Midwest Engineered Systems offers design/build services to provide these services to existing systems and equipment. Our extensive experience in a variety of industries gives us a unique ability to assist with these applications.

## Typical Systems & Equipment Retrofits:

- Drive and Control Systems
- Machine Modifications
- Equipment Relocation Services
- Safety Systems
- SCADA Systems
- Servo Control Systems
- Robotic Programming and Cell Modifications
- Software/Programming
- Factory Automation Systems
- Obsolete Systems

For over 30 years, MWES has completed hundreds of system and equipment modification projects for customers requiring custom design/build assistance. As with all of our projects, the engineering staff at MWES consults with each customer to thoroughly evaluate the existing operation to determine future functionality. Our solutions offer enhanced performance, better operation and improved maintainability.
