

WELDING POSITIONERS

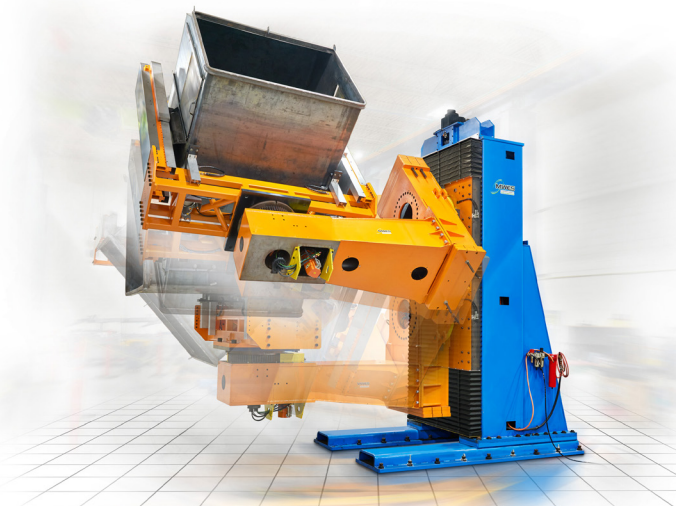

Robotic welding positioners are offered in a large range of models and capacities and are one of MWES' most popular welding capabilities. Our welding positioners allow robotic manipulators to move weldments in one or more axes. This gives the robot precise positioning for optimal welding for any type of components from simple to complex geometries.

Styles offered:

HEADSTOCK/TAILSTOCK - SKYHOOK - DROP CENTER POSITIONERS

POSITIONER BENEFITS

- Vertical lift capability
- 360° rotation
- Optimum weld seam quality
- Solutions for every size work piece
- Holds, positions and moves parts seamlessly
- Controlled and positioned as an external axis in the robot controller system
- Used for both robotic or manual welding
